

SHOELANDS DIRECTORY

Shoelands Farm offers six office units giving a total space of just over 7000 square feet. The individual offices are set within Surrey's Hampton Estate. Please see below for details of the various businesses that occupy our offices.

Scott Brown Risk Management Surveyors (SBRMS) provides a range of valuation surveys for all types and sizes of residential property from stately homes and country farmhouses to detached and semi detached properties.

We currently have fourteen suitably qualified Surveyors strategically placed throughout the UK and we also undertake work in Ireland and mainland Europe. Our services include property valuations, condition reports, contents valuations, risk appraisals and indemnity. In particular we are experts in rebuild valuations and will always ensure that home owners have the correct level of insurance. Our clients include high net worth insurers, brokers and their clients.

SHOELANDS DIRECTORY

The milk that might change everything.

Our cows produce great tasting fresh milk that naturally contains only the A2 protein. If drinking regular cows' milk gives you digestive issues, you may just feel a difference with a2 Milk™.

Regular cows' milk contains A1 and A1 proteins, and for some, A1 causes side effects such as bloating, nausea and mucus build up. Our British dairy cows are carefully selected because they naturally produce milk with only the A2 protein so it's gentler on your stomach.

Many people can feel the difference after drinking a2 Milk™. If you have trouble digesting regular milk, a2 Milk™ could be for you.
